

Lab 3

Write a MIPS program to perform the following tasks:

- Print the message "Hello World"
- Print a new line character (\n)
- Print the message "Goodbye Cruel World!"

Example output:

```
Hello World
Goodbye Cruel World!
```

The following is required for all assignments and is included in the rubric for grading:

- You need to name your file as "LastName-Name-Lab3.asm" (Example: Talley-Michelle-Lab3.asm)
- Your program will need to have the exact output unless otherwise stated.
- Your source needs to have comments that explain your implementation.
- You need to include the following set of comments at the top of your source code for all assignments.
#Your Name
#Assignment # (Example: Lab #3)
- You need to submit your source code on blackboard.
